### BCD Groups Stunning Multi-Use Complex Project

The development and investment concern BCD Group is continuing preparation in Aš (a Czech town next to the German border) on an exciting multi-use project.

The extensive complex containing health-care facilities, blocks of flats, hotels, a convention centre, casino, technology park and office buildings will be going up over two phases on an area of more than 70ha.

The project, which is currently dealing with issues of zoning and planning decisions, is to be presented by BCD Group on the international scene for the first time at the Expo Real Trade Fair in Munich this October.

"The town council approved the regional studies for the development of the location and we are now preparing the documentation for the zoning and planning decision. After it is issued we will immediately apply for the building permit so that we can start building as soon as possible in cooperation with our partners. Of course in light of the scope of the project there is room for other investors or interested parties that would like to develop this unique project with us. We would like to discuss this topic with them at this years Expo Real in Munich. Our objective, together with the town of Aš, is to create a new centre of the Euroregion," stated the Director of BCD Group, David Shelef.

Because of the size and scope of the project construction of the entire complex is expected to take several years over two stages spanning from 2013-20.
